What is Roxicodone?

Roxicodone is one of the popular brand names under which Oxycodone is available. It belongs to the opioid medication class, used as a first-choice treatment for pain (moderate to severe).

You can easily **buy Roxicodone online** or purchase the medicine from a local drug store near you, but being a scheduled and controlled drug, buying or selling Roxicodone without a proper prescription is not permitted.

Why is it used?

Roxicodone belongs to the family of **opioid medication** that works on the brain and nervous system to provide relief against pain or other medical conditions as determined by the doctor.

What to do if an overdose happens?

Roxicodone can adversely affect you if taken in excess. It can cause you the following overdose symptoms:

- » Severe drowsiness or dizziness
- » Pinpoint pupils
- » Slow or shallow breathing
- » Breathlessness

You should **consult your doctor** ASAP if an overdose happens. You can also seek emergency medical assistance by calling the Poison helpline at 1-800-222-1222.
