123.HP.COM Setup and Quick Installation

To set up the HP printer on any device (computer, phone, etc.), you will need to download the appropriate driver for your HP printer. This can be done simply by selecting the correct printer model before downloading the drivers (supporting software). However, before you begin setting up your HP printer, consider the following important points. All models of the HP printer are listed below. Please select the appropriate model to download the drivers. Always make sure that the HP printer is turned on and connected to the same Wi-Fi network as the system at the time of setup. You can do this by enabling the Wi-Fi button on the printer to make it discoverable on the network. Before starting the setup, check your firewall settings to make sure that the firewall is not blocking the printer driver. 123 HP COM SETUP - Ways to connect HP Printer to router First, turn on your wireless printer and set up the HP printer wirelessly using the touchscreen display. Now press the "Setup" button on the touchscreen and select the "Network" option in the menu. Then select the Wireless Network Setup Wizard from the Network menu. Your HP printer will now search for the wireless routers available in the region. Select your network from the list. For more details, you can call us at: 1-877-323-1333.
