Barry Sanders is one of the top running backs in the sport, without doubt. He's extremely fast and nimble, with 94 juke moves. Sanders isn't weak ; the card has an 87 power score despite only having 76 strength.

Unfortunately, players won't need to throw the ball all that frequently. Sanders will catch swing passes and screens, but anything beyond ten yards is risky. Even though the Sanders card is S grade, there is more upside to be had with another Sanders below.

Falcons fans know how unbelievable Deion Sanders was in his heyday. Gamers will have the ability to plug and place Sanders wherever they need on the field. He can be an elite lockdown corner during Madden 21 and players will not even have to update the card.

Sanders has 96 speed and 99 acceleration, with S tier defensive stats. Sanders can play receiver, slot, tailback, corner, and security, among other positions. There is just too much price and versatility from the card for players to pass it up.
