I really like this!How does this hold up with Animal Crossing Bells time? I've been thinking about getting some tattoos within this style.

Congratulations on your very first tattoo such a great one!Such a cool concept and execution is beyond! My favorite style of tattoo, as well as one of my favourite games!Thanks for putting a name to this, I have never understood it, but actually like the style!

Over the years ink spreads and flares a bit below the skin, so the shading and linework being mostly well-spaced points gives me assurance that this can age well. Skin care and UV protection are ALWAYS crucial to ink aging well, regardless of what the true tattoo is.
