## BEST MAKEUP ADVICE FOR BEGINNERS

*People who are doing makeup for a very long time are definitely more experienced and know a lot of tips before starting their makeup.*

People who are doing makeup for a very long time are definitely more experienced and know a lot of tips before starting their makeup. But if you are new to the world of makeup, there is no need to worry about anything here. I have a few amazing tips for you guys to follow to have a perfect look. First, if you are going out to buy some makeup product, be sure to never compromise on the product quality because you will be applying these products on your face and skin is very sensitive. So be sure to choose the best quality products that do not fall for cheap ones.

The first step to apply is that you should hydrate your skin properly so use a good moisturizer for it. Then apply a primer to cover up any pores in your skin so that your foundation will be set properly on your skin. 3rd and one of the most important steps is use of a correct color foundation that is not too light or not too dark for your skin tone. Apply a nice coat of foundation on your skin and blend it well until it's even on your skin leaving no place with a different color tone. Make sure to use a lighter color concealer if you need to cover dark circles under your eyes and to cover crow feet. Settle your foundation and concealer with powder so that your foundation won't be cakey or breakout.

Next is the use of a bronzer, blush and highlighter. Bronzer is used to give you a very soft, subtle and natural look but this is something you as a beginner can skip. Next select the shade of your blush according to your skin tone, like if your skin tone is naturally pale then go for a reddish pink shade. The highlighter is again a step you can skip if you think you are not ready to use it but highlighter will compliment your cheek bone and make your makeup look perfect even more. You can fill your eyebrows with brow filler powder. Apply a thin layer of eye liner or an eye pencil to complement your eye shape. If you want to apply eyeshadow, select the color according to occasion like for a daily look you can use a soft nude pallet that will definitely make your eyes look prettier and won't stand out too much. Finally, you can use your favorite color of lipstick/ lip gloss or a lip pencil to complete your perfect look.
