**Generic Name:** Amphetamine and dextroamphetamine

**Brand Name:** Adderall

**Drug Class:** CNS stimulant

What is Adderall?

Order Adderall Overnight Delivery is a CNS stimulant of the phenethylamine class. Being a highly addictive medication, the Food and drugs administration (FDA) Controls its production, supply, availability, and distribution. You can purchase Adderall (tablets or extended-release tablets) only with a proper prescription from your doctor from a chemist shop near you or order Adderall online. If you buy the medicine via an online store, you can reap the benefit of a hefty discount on the medication.

## How does Adderall work?

Order Adderall Overnight Delivery is a CNS stimulant that works by increasing the activity of specific neurotransmitters in the brain, namely, dopamine and norepinephrine. It also makes the body release various other hormones and brain chemicals like epinephrine, serotonin, and histamine.

The increased levels of these brain chemicals help a person with attention deficit hyperactivity disorder (ADHD) be calm and focus on the work. It also helps treat narcolepsy, a daytime sleeping disorder.

If you are having difficulty concentrating on work or have ADHD symptoms, you can easily buy Adderall online and start using it after consulting with a doctor.
