## The path of exile The New End Game Boss Killed by Professional Warcraft Player

path of exile hosted the very successful Exilecon (home of Grinding Gear Games) in New Zealand and previewed the patch with patch 3.9 along with earlier versions of PoE 2. The 3.9 patches are called "Atlas Conqueror". It is very difficult for the average player to win quickly in the game, but if you accumulate Exalted Orb, it will always help a lot.

The update includes a comprehensive overhaul of atlas mechanics, and more importantly, a new endgame. Shapers and antiquity were overthrown by a group of exiles, and new Atlas mechanics and brand new bosses made this game particularly attractive to competitors and the entire community. To reach the ultimate boss, players must endure heavy friction, constantly putting them on many fatal challenges.

All the famous ribbons jumped into the competition, many of which were overwhelmed many times by the new ultimate game boss or the ever-changing work made by Transformers technicians. But one of them found the way to victory after 5 days, 15 hours, 24 minutes, 15 seconds.

He is a champion of top guilds, many of the world's number one bosses under their command, and also competes as a disruptive dealer for Method NA in the dungeon tournament. Although he chose not to broadcast the death penalty itself and cited the delay caused by the death penalty, he recorded the incident and made it available for everyone to watch.

The game itself is very attractive, just watching the game is also very exciting. If you are also a fan of Poe, if you don't have enough time to play the game, you can choose to Buy Chaos Orb from PoEcurrency.com. Whether it is the price or the speed of delivery, you will never be disappointed.
