

Cognos Enterprise

Cognos Enterprise transform data into value and make smarter, quicker decisions with IBM business intelligence solutions. Adding built-in intelligence to self-service, these solutions easily amplify and embed insight into everyday actions to help you move from reactive to proactive decision-making. The range of analytics capabilities are available, on premises and on cloud. The full range of self-service and managed platform capabilities scales as you grow, addressing your current and future business intelligence (BI) needs.
