

M_o_R® (Management of Risk)

M_o_R® (Management of Risk) is a framework designed for **risk management in the organization**. It is owned and published by the Cabinet Office (ex OGC). M_o_R is a flexible and robust framework that enables organizations to re-evaluate their risks.

M_o_R methodology in practice: Management of Risk is a framework, a set of recommendations that help assess the risks from several levels (perspectives): strategic, program, project and operational.

The MoR Framework is divided into three publications:

- » **M_o_R Principles** - basics of risk management
- » **M_o_R Approach** - how the management principles are adopted in the specific organization
- » **M_o_R Processes** - defines four basic processes of risk management - inputs, outputs, activities, evaluation and control

It is designed for decision makers and managers who are responsible for **risk management** across the organization.
