

MoV® (Management of Value)

MoV® (Management of Value) is a methodology owned and published by the Cabinet Office (ex OGC). It is designed to **manage the flow of value** in the organization, i.e. how to effectively achieve the objectives with the available resources without reducing quality.

MoV methodology in practice: The aim of **Management of Value** is to help organizations use an integrated methodology and extend their practical experience to help deliver the **value** with better use of their resources. MoV combines methodology and a guideline that is focused on the management of the project portfolio, programs and projects in the private and public sector. It is known as **P3RM guide** (Portfolio, Programme, Project and Risk Management).

Management of Value is intended for **senior management** (top management).
